

## HC MEDICAL PHARMACY

### INFINITY

**MYO ROOT+**  
HC MEDICAL PHARMACY

#### What is MYO ROOT + 250mg?

**MYO ROOT + 250 mg** is a specially produced capsule that finishes your body with the diseases that are in the initial state or to come, and the diseases that have entered the chronic formation and completely settled in your body, from your Anatomy and that will end your lifelong drug use.

#### WHAT IS CHRONIC DISEASE?

Chronic disease is a disease that takes place in a person's life for a long time and can be controlled with control drugs and treatment methods.

**MYO ROOT + 250 mg** analyzes the diseases that occur in our body.

- Before the patient uses **MYO ROOT +**, analysis and examinations are examined; The patient is diagnosed with a fully finalized diagnosis, **MYO ROOT + 250 mg** is determined to be used once or twice a day, and treatment is started.
- 60 minutes after the capsule is swallowed. Then it takes action for the Mitosis division process.
- It starts to treat the damaged organ or organs in the body by circulating in your blood.
- During the first 3 days of mitosis, it is strictly forbidden to consume solid food or liquid-acidic drinks containing drugs.
- On the 4th day, solid food can be released to the patient in a controlled manner according to the weight status.
- **MYO ROOT + 250 mg capsules are used for 90 days.**
- The patient must be under the control of a doctor in the use of **MYO ROOT + 250 mg**.
- Side effects that may occur in the first 3 days of the use of **MYO ROOT + 250 mg**;

nausea

dizziness

diarrhea

weakness

Nervous conditions may occur.

**MYO ROOT + 250 mg is 100% herbal and does not contain any additives or synthetic preservatives.**

**MYO ROOT + 250 mg There are no additives or components that will harm human and animal health.**

**MYO ROOT + 250 mg There are no additives or components that will harm the nature.**

#### Chronic diseases completed by MYO ROOT + 250 mg

- Fibromyalgia
- gynecological cyst
- What is edema?
- Anemia
- Liver regeneration
- Colon cancer and colon diseases
- hepatitis

- nerve entrapment
- Blood pressure disease – Hypertension
- Elephant disease - lymphedema
- constipation
- Intestinal flora imbalance
- Infection of the kidneys and adrenal glands
- Gallbladder cleansing and regeneration
- Lung ailments
- Skin moisturizing and cleansing
- Cleaning the Plasma
- Regeneration of red blood cells and white blood cells
- Facial skin and subcutaneous regeneration
- cell regeneration
- Normalization of platelet value
- Cerebellum normalization
- Strengthen the autophagy system
- persistent weakness
- Taking control of Alzheimer's disease – Ended Anatomy has also resulted.
- Normalizing kidney functions
- Removal of Fungi and Bacteria
- Cleanses heavy metals in anatomy
- Ending infections in the body
- brain fluid return to normal
- migraine
- headache
- What is an allergy?
- Sleep apnea
- Shortness of breath - Dyspnea
- reflux

**MYO ROOT + 250 mg capsule cleans the root of disease and formation.**

**What is fibromyalgia?**

Fibromyalgia is a soft tissue rheumatism characterized by general muscle pain and chronic pain at certain points in the body. The disease is accompanied by various physical and psychological symptoms such as fatigue, insomnia and depression.

Fibromyalgia syndrome, which is seen in approximately 3% of the population, is more common in women.

**Gynecological diseases; Cyst**

Cyst; It is the name given to fluid-filled, lump-shaped masses that occur due to some reasons in any part of the body. Cysts that can be seen in tissues or organs vary in size. Cysts, which are mostly benign, can occur without causing any symptoms.

It is known that in some cysts, women experience irregular and long-term menstrual cycles. In some cases, it is an important symptom that the cysts increase the frequency of urination by pressing on the bladder of the person. Sometimes the cysts formed in the uterus are very small in size and do not show any symptoms.

**Ödem nedir?**

Edema is a health problem characterized by swelling in the legs, feet, arms and hands due to excessive fluid accumulation in the tissues. It can affect a small area or the entire body. Medications, pregnancy, infections, and many other medical problems can cause edema.

## Anemia

Anemia or anemia is a condition that occurs when the body does not have the necessary amount of healthy red blood cells to carry enough oxygen to organs and tissues. Anemia occurs when the number of red blood cells in the circulation decreases.

Anemia or anemia is a condition that occurs when the body does not have the necessary amount of healthy red blood cells to carry enough oxygen to organs and tissues. Anemia occurs when the number of red blood cells in the circulation decreases.

## Liver regeneration

The liver is the only internal organ of our body that can regenerate itself. Apart from the liver, it also transitions to the state of regeneration in our body with a simpler and different mechanism in the skin and intestines.

**MYO ROOT + 250 mg** It provides regular operation by normalizing the factory of your Anatomy by ending liver fattening.

## Colon cancer and colon diseases

The mostly digested nutrients from the small intestine are decomposed again in the colon region, and the remaining part is stored in the rectum after the water and minerals are removed, to be excreted through the anus.

Cancer that occurs in the colon in the large intestine is called colon cancer.

- Colitis
- Intestinal Obstructions
- Spastic Colon.
- Meckel Impasse
- Crohn's Disease
- Intestinal Worms

## Hepatit

Hepatitis is the inflammation of the liver. Infection with the hepatitis A, B, or C virus is among the most common causes of hepatitis.

Although living with hepatitis A does not cause great harm to the body for life, Hepatitis B or C can cause chronic inflammation, cirrhosis, developmental cancer and even elevations if left untreated.

## Nerve entrapment

Nerve compression is a condition that occurs due to pressure created by tissues such as bone, cartilage, muscle or tendon around a nerve.

As a result of this pressure effect, nerve functions are negatively affected and symptoms such as pain, tingling, numbness or weakness may occur.

## Blood pressure disease – Hypertension

Hypertension is the name given to a common medical condition in which the force exerted by the blood carried from the heart to the body on the artery walls is high enough to cause health problems such as heart disease. Hypertension is also known as high blood pressure.

### Elephant disease – lymphedema

Elephant disease (lymphedema), which manifests itself with swelling of the arms and legs, occurs due to blockages in the lymph nodes, which are a part of the immune system. In order for the fluid that fills the intercellular spaces to remain in balance in quantity, it must be filtered continuously and mixed into the blood circulation.

### Kabızlık nedir?

Constipation is a common problem that occurs as a result of slowing down bowel movements. The resulting stool may be too hard or too small. There is also a feeling of strain while using the toilet.

Constipation is the need to defecate less than three times a week.

### İntestinal flora imbalance

We see symptoms such as intestinal flora imbalance, nausea, vomiting, feeling of heaviness, swelling in the abdomen, abdominal pain, malaise, weakness, diarrhea and constipation.

This imbalance; It occurs with a decrease in the production of components that can be called beneficial and a decrease in vitamin absorption.

In addition, the flora succumbs to infection.

This situation causes intestinal flora imbalance and may occur in different diseases.

### Infection of the kidneys and adrenal glands

There are many diseases originating from the adrenal gland, but the most important ones are Addison, Adenoma, Aldosterone and Cortisol diseases. Apart from these diseases, there are various diseases such as adrenal hyperplasia, adrenal Cushing's syndrome, primary hyperaldosteronism, pheochromocytoma, adrenocortical carcinoma.

As a result of the infection reaching the kidneys, the patient may develop high fever, flank pain, chills and chills. At this stage, appropriate antibiotic therapy should be initiated by hospitalization.

If left untreated, the infection will become chronic and kidney inflammation will occur frequently.

### Gallbladder cleansing and regeneration

Obstruction of your bile ducts can cause jaundice and inflammation.

Worse, if they manage to enter the pancreatic duct, which connects to the main road, it can cause pancreatitis, which is a much more dangerous condition, that is, inflammation of the pancreatic gland.

- chest pain
- Stomache ache
- Shoulder pain
- Vomiting
- clay-like defecation

Gallstones can cause obstruction in the biliary tract, which is produced in the liver and transferred to the small intestine through the gallbladder. After the common canal is blocked, conditions such as intense pain, jaundice and canal inflammation may occur.

### Lung ailments

Lung Diseases mainly consist of asthma, bronchitis, accumulation of water in the chest, shortness of breath, hydatid cyst, pleurisy, tuberculosis and pneumonia. The most common lung diseases are asthma and COPD Chronic Obstructive Pulmonary Disease.

Skin moisturizing and refreshing

**MYO ROOT + 250 mg**, which helps the skin regain the lost moisture, plays a major role among the skin rejuvenation methods.

### Cleaning the Plasma

**MYO ROOT + 250 mg** treatment is the restoration of slowed cell regeneration with plasma in one's own blood.

With the treatment of **MYO ROOT + 250 mg**, skin rejuvenation, hair loss and disorders that will cause problems in Anatomy are gradually finished.

Regeneration of red circles and white circles in the blood

Approximately 10 million red blood cells die in the human body every second.

Approximately 200 billion new cells are formed every day. In this way, the regeneration of all red blood cells in the body takes place in a short period of 3 months.

### Facial skin and subcutaneous regeneration

When you start using **MYO ROOT + 250 mg**, it ensures that your face and skin quality returns to the desired quality and healthy state.

### cell regeneration

Cell renewal is the repair of damaged cells and the formation of new ones.

Before healthy cells are formed, all your functions, including the functioning of organs, are damaged. Although cell renewal in humans is limited compared to some other living things, it is effective in processes such as growth and healing.

### Normalization of platelet value

With the initiation of **MYO ROOT + 250 mg** treatment, the murmuring in your blood gradually returns to normal.

As a result of the complete blood count in a healthy person, the platelet value should be between 150,000 and 450,000 cells/ml.

### Cerebellum normalization

The blood flow to the brain means the blood that reaches our brain all the time. Our brain needs almost 20% of the blood pumped with each heartbeat. This also includes glucose, which is vital for our energy.

When your brain doesn't get enough blood, it can cause ischemia: a small part of our brain tissue starts to die, fewer connections are formed, our memory is disrupted, the risk of cerebral palsy increases.

The importance in this situation is that the increase in blood flow to the brain, even by a small amount, helps protect us from serious diseases. Thus, the development of a healthy brain and higher cognitive functions means that our memory and concentration are strengthened.

### Strengthen the autophagy system

**MYO ROOT + 250 mg** Autophagy (autophagy, "self-eating") is the body's way of cleaning damaged cells in order to obtain new and healthier cells. It plays an important role in the destruction of misfolded or aggregated proteins, clearance of damaged organelles and elimination of intracellular pathogens.

### Persistent weakness

With **MYO ROOT + 250 mg** Capsules, you can lose weight permanently in your body; It does not harm your muscle structure. All toxins and fats that need to be removed from your anatomy are removed with smart cells within 90 days. Without the need for stomach reduction surgery or balloon treatment, **MYO ROOT + 250 mg** treatment completely saves your health from all the negativities that disrupt your psychology and social life.

### Take control of Alzheimer's disease MYO ROOT + 250 mg – Results in Ended Anatomies.

Untreated depression. Head trauma Smoking or exposure to secondhand smoke. As **HC Medical Pharmacy**, at the end of the research, Alzheimer's disease; shows that the same factors associated with heart disease such as lack of exercise, obesity, high blood pressure, high cholesterol, and diabetes may increase the risk of Alzheimer's disease.

### Normalizing kidney functions

Kidney failure is a condition that causes a decrease in kidney function. Kidney failure, which may develop due to different reasons, may cause patients to become dependent on dialysis.

A near-permanent treatment for kidney failure patients can be achieved with kidney transplantation.

**MYO ROOT + 250 mg** capsule reduces creatinine and urea values and gradually normalizes kidney values.

### Removal of Fungi and Bacteria

Bacteria are unicellular, prokaryotic organisms that do not have a true nucleus and contain several membraneless cell organelles.

Fungi are multicellular eukaryotic organisms that do not produce their food on their own and are characterized by a chitin cell wall. Bacteria is a prokaryotic cell.

Fungi It is eukaryotic cell.

**MYO ROOT + 250 mg** capsules cleans the fungal cells and bacterial cells in your anatomy.

### Removes heavy metals in anatomy

Heavy metals such as iron, lead, cadmium and mercury in your body damage your organs over time. These damages may cause you to stay in negative medical conditions in the future, as well as being disconnected from your social life.

**MYO ROOT + 250 mg ends the negative in your life by finishing the heavy metals in your anatomy.**

### Ending infections in the body

Infection occurs through certain bacteria or viruses. Microorganisms found in most environments, such as air and water, multiply rapidly when infecting the body. When it reacts as a result of this proliferation, an infection occurs.

**MYO ROOT + 250 mg** clears infections from your body.

### Brain fluid return to normal

Hydrocephalus is the accumulation of excess fluid in cavities deep in the brain called the ventricles.

This buildup is often caused by a blockage that prevents excess fluid from being removed. Excess fluid increases the size of the ventricles and puts pressure on the brain.

### Migraine

Migraine is a type of headache that occurs as a result of changes in the nerves and blood vessels in the brain. Individuals with migraine have a nervous system that is sensitive to attacks, and attacks can be triggered by some factors in the external environment.

### Headache

Headache; It is known as a condition that disturbs a certain part of the head and is compressive and prominently disturbing.

Headache is a disease state that comes on slowly or suddenly and disturbs Anatomy for a few hours or a few days.

### What is an allergy?

Allergy is the antibodies in our body fighting and reacting against substances that may be harmless to others.

These substances can be dust, nutrients, inhaled substances, pollen, mites and animal dander. Allergy can be seen in all age groups.

### Uyku abnesi

Sleep apnea can be defined as cessation of breathing during sleep.

In sleep apnea syndrome, temporary suffocation lasting for a few seconds can occur during sleep.

During this suffocation, the oxygen level in the blood drops, allowing the brain to wake up.

The brain wakes the body to let the respiratory functions cease.r.

### Shortness of breath – Dyspnea

Shortness of breath, which is defined as dyspnea in medicine, is defined as the inability of the person to breathe enough.

When the person feels that he cannot fill his entire lung capacity with air; he feels every moment he breathes, unlike normally.

### Reflux

Reflux, which is defined as the escape of stomach contents into the esophagus, requires long-term treatment.

Burning in the breastbone, sour or acidic stomach contents coming to the mouth after a meal, belching, hiccups, difficulty in swallowing, nausea and hoarseness in the morning are the symptoms of reflux.

---

### Pregnancy

**Do not use MYO ROOT + 250 mg in case of pregnancy.**

---

### Breastfeeding

**It passes into breast milk; Do not use MYO ROOT + 250 mg**

---

### USE OF VEHICLES AND MACHINES

**If you experience dizziness, drowsiness or visual disturbances after taking MYO ROOT + 250 mg, do not drive or operate machinery or tools until you feel normal.**
